Github: <https://github.com/JP-ctte>

Web Portfolio: <https://jp-ctte.github.io/Portfolio/>

Aspiring web developer with a solid foundation in front-end and back-end programming, user interface design, and database management. Passionate about building responsive, user-friendly websites, optimizing performance, and continuously enhancing skills to stay ahead in the ever-evolving web development landscape.

EDUCATION | Bachelor of Science in Computer Science

TECHNOLOGIES AND LANGUAGES

FRONTEND DEVELOPMENT | HTML, React.js, JavaScript, CSS

BACKEND DEVELOPMENT | Php, Java, C#

TOOLS AND TECHNOLOGIES | MySQL, VSCode, Github

PROJECTS

Web Based Point of Sale System | Php, Javascript

Role: Full-stack Developer

- Designed and developed a full-stack, web-based Point of Sale (POS) system for a real client using PHP and JavaScript. The system features comprehensive sales tracking, robust inventory management, and seamless MySQL database integration currently deployed.

Web Based Hotel Reservation System | Php, Javascript

Role: Full-stack Developer

- Designed and developed a full-stack, web-based Hotel Reservation System for a real client using PHP and JavaScript. The platform includes sales tracking, booking management, room allocation, and guest management, all seamlessly integrated with a MySQL database.
-
